**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Townhill (2,377,463). Townhill shows a piston for an internal combustion engine, composed of a metal part cast in one piece, which utilizes lugs 15 provided on the base of the internal cavity of the piston, said lugs being provided with a hole for the passage of the piston pin joining the piston and the rod, having skirt openings which give access to the holes, and reinforcing ribs 21. Townhill shows everything except for the manufacturing process, and the long list of materials cited as various alternatives, which may be utilized in the process of manufacturing the piston, which are not given weight, since the claims are of the product-by-process type. See MPEP 2113.

### ***Allowable Subject Matter***

Claim 1 is allowed.

### ***Response to Arguments***

Applicant's arguments with respect to claims 2-14 have been considered but are moot in view of the new ground(s) of rejection.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the one-piece cast pistons of Haug (3,703,126, Kramer et al (2,865,348) and Kubis et al (3,943,908).
